***Modernising landing doors simply and efficiently***

**MOD SOLUTIONS**

## Modernisation solutions for landing doors

**MEILLER MOD: That's how it works today!**

Transom is cleared of all mechanical and electrical components ...

... to be replaced by the MOD ComfortLine modernisation solution

## MOD ComfortLine

When a lift system is modernised, the landing doors are the most complicated elements to deal with.

The modernisation solution **MOD ComfortLine** restores the smoothness and comfort of new doors without causing any noise or dirt.

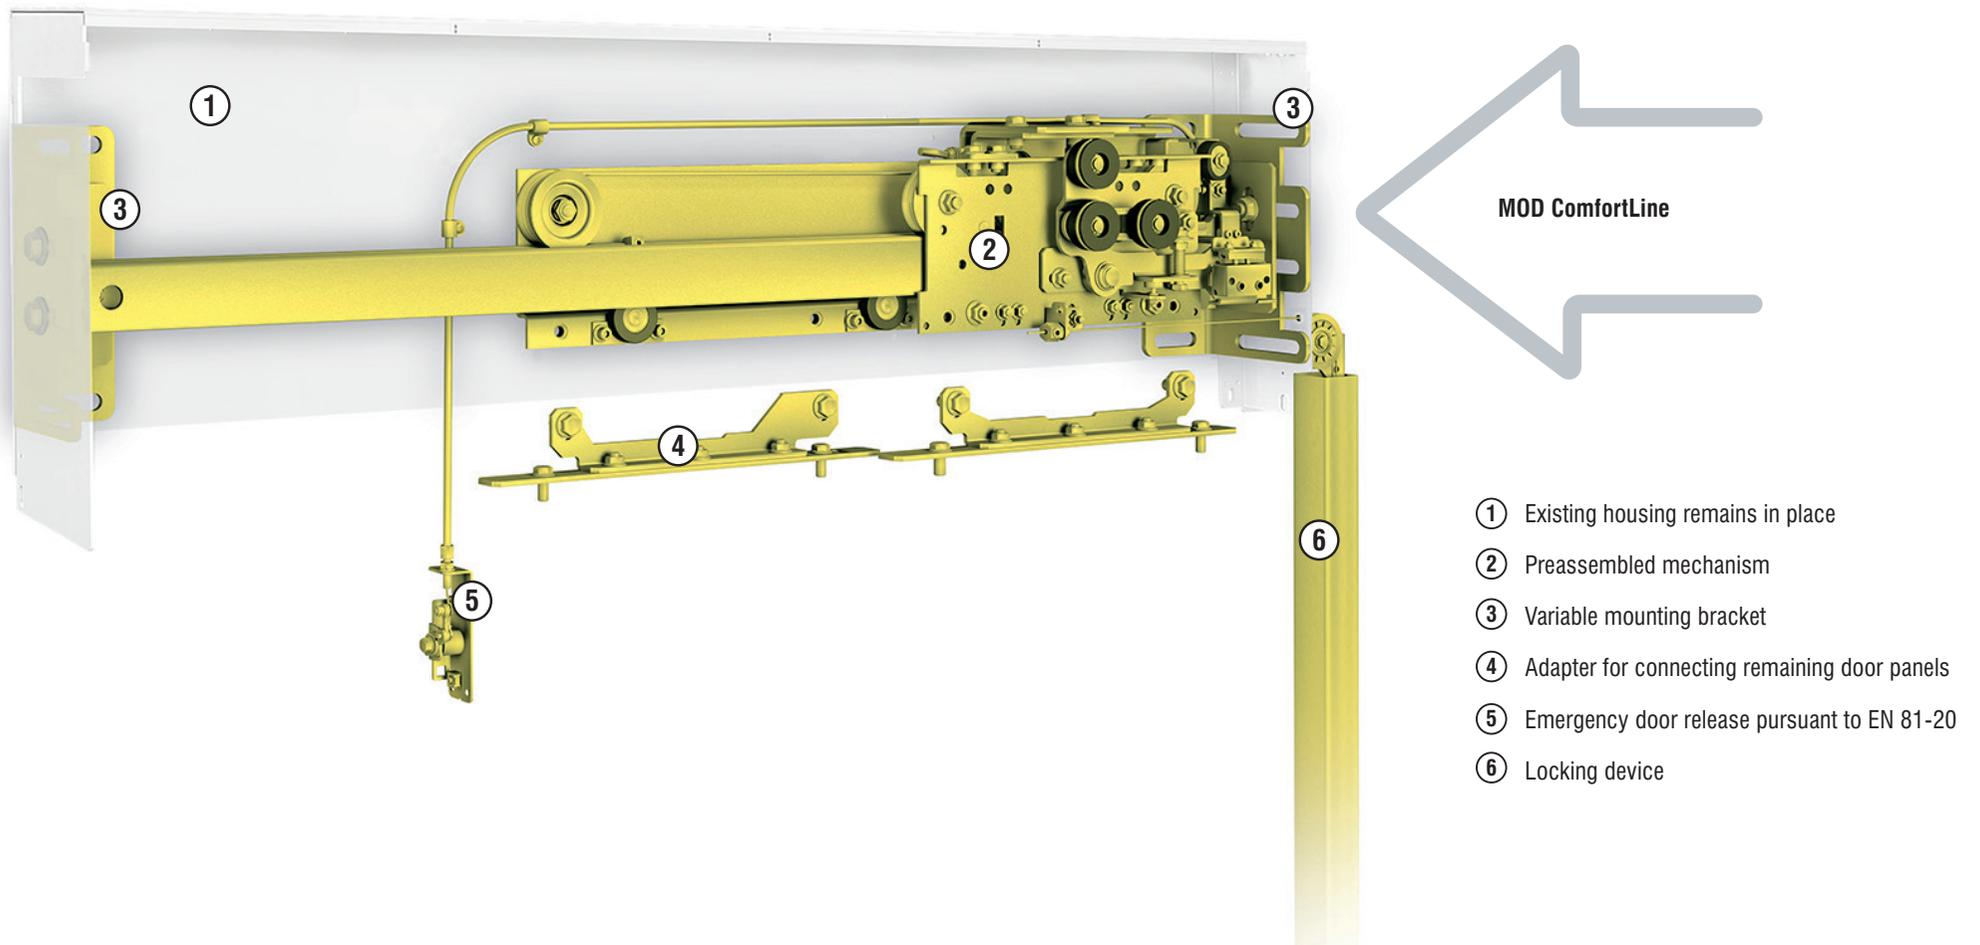

The door frame, transom and door panels remain in place.

The mechanism is individually modified to suit the remaining landing door panels.

The position of the hook lock rollers is coordinated for current Meiller skate systems.

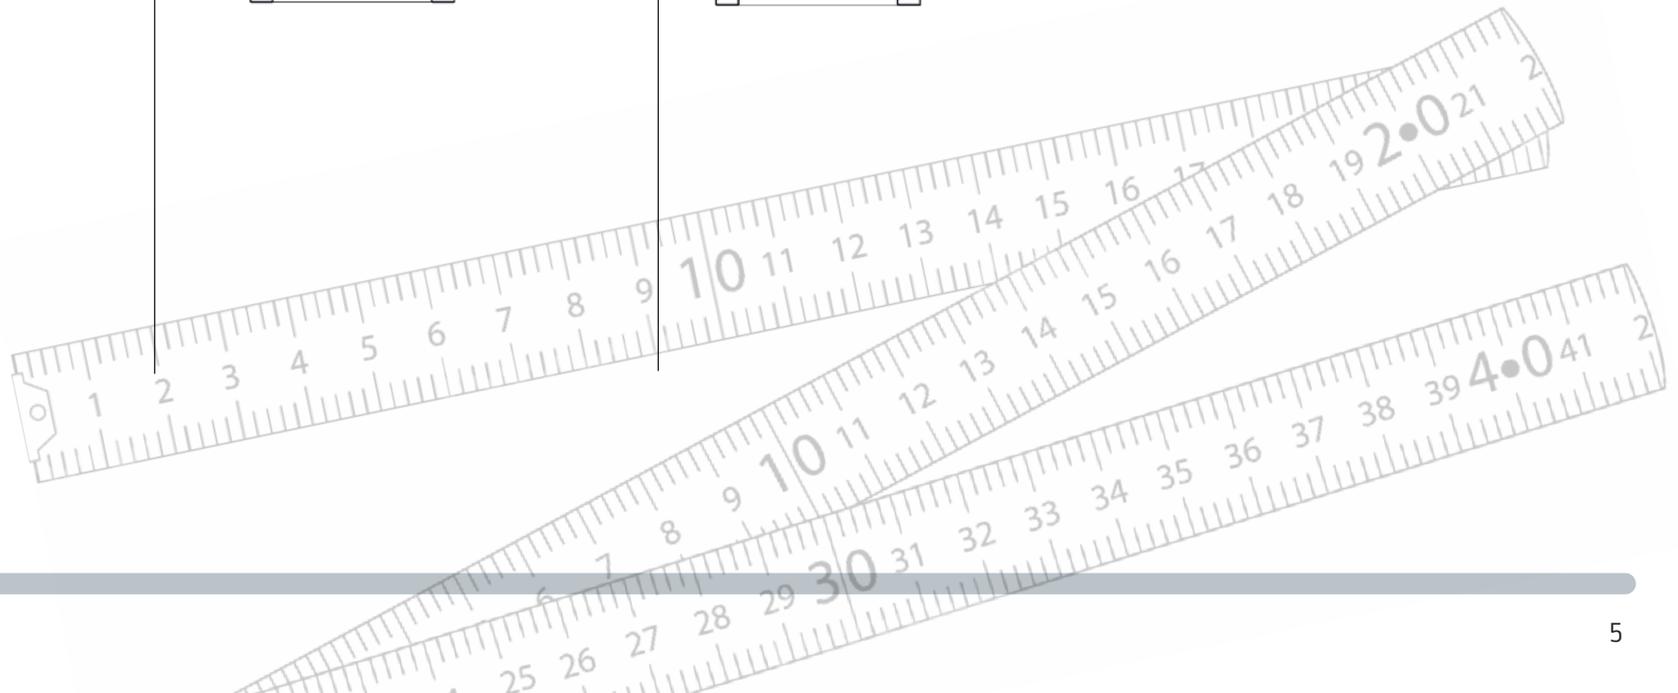

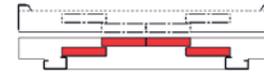

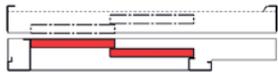

**MOD ComfortLine** - The perfect solution for increasing availability and enhancing the convenience of existing landing doors.

### MOD ComfortLine components

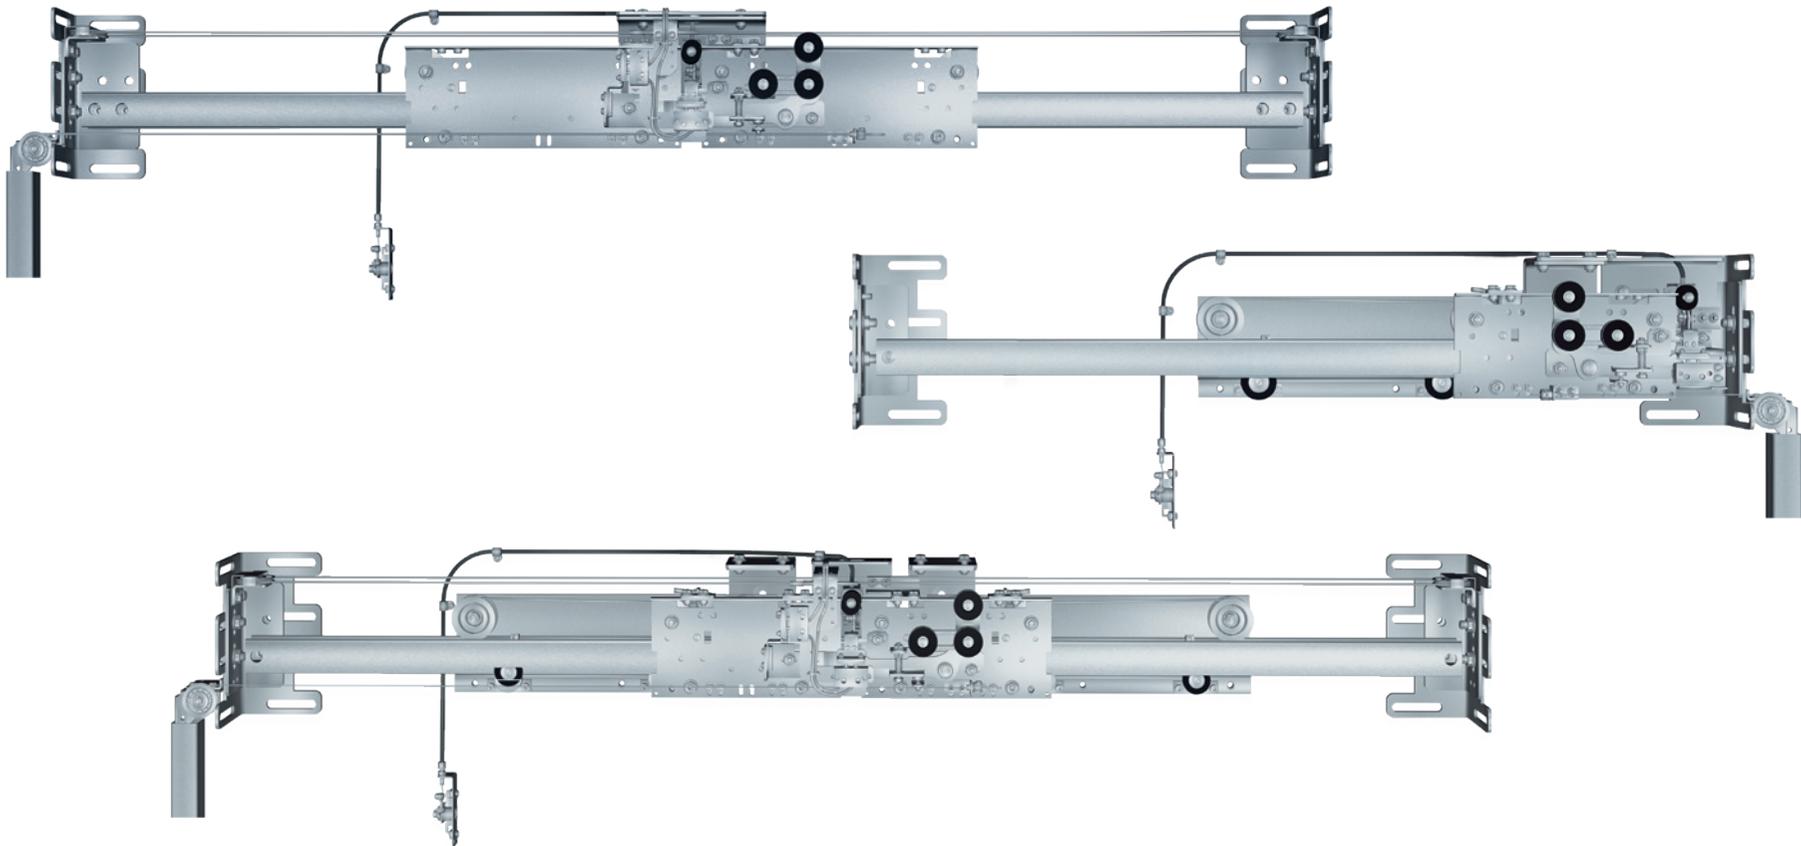

## Landing door types and dimensions

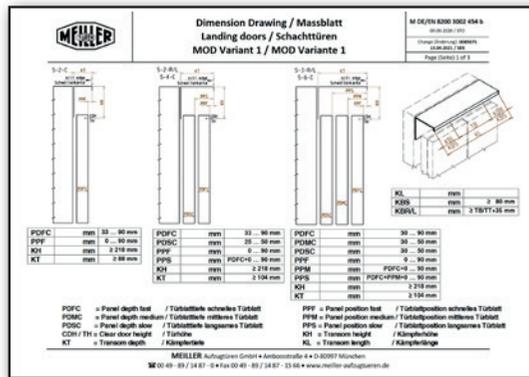

Two-panel telescopic (T2)	Two-panel centre-opening (C2)	Four-panel centre-opening (C4)
CDW = 700 - 1400 mm	CDW = 700 - 1400 mm	CDW = 1200 - 2400 mm
CDH = 1800 - 2600 mm	CDH = 1800 - 2600 mm	CDH = 1800 - 2600 mm

## Our MOD solutions Your benefits

### Enhancing the value of your lift installation

- > State-of-the-art technology
- > Improved running characteristics

### Increased cost-effectiveness

- > Door contacts, rollers, cables, guides, etc. replaced with the latest MEILLER components
- > Reduced fault frequency

### Benefits to operators and residents:

- > Smoother running for greater travel comfort
- > No dirt or noise in the corridors, all work performed in the shaft
- > No coordination required with other works

### Lower cost than complete replacement of car and landing doors

- > MEILLER MOD solutions are generally cheaper to realise than replacing all the doors
- > No complex follow-up work by builders, floorers or tilers
